

# CONVERSION EXERCISES

Instructions: Show your work to convert each of the following shapes to the correct dimensions in the unit of measurement listed. For example, a 2 inch square would convert to 12p0 X 12p0. For inches, only determine the size to the second decimal place, and do not round up the values. Width values go first in the conversions.

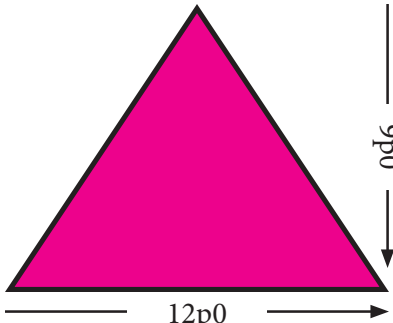

a.

Convert to inches:  
2.13" X 2.38"

Convert to points only:  
154 X 172

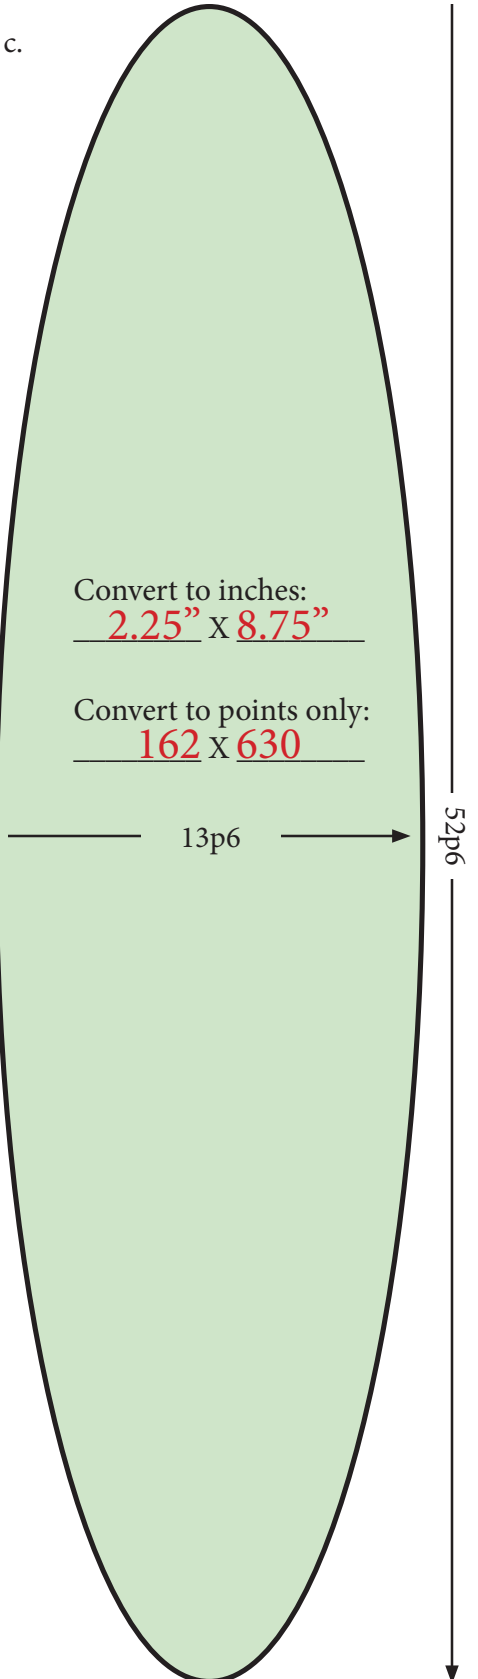

b.

Convert to inches:  
2" X 1.5"

Convert to points only:  
144 X 108

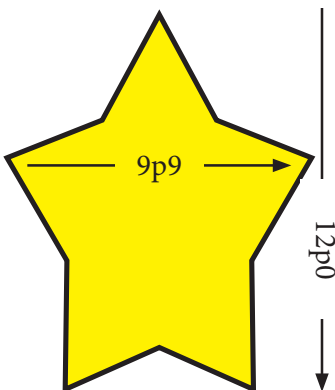

c.

Convert to inches:  
2.25" X 8.75"

Convert to points only:  
162 X 630

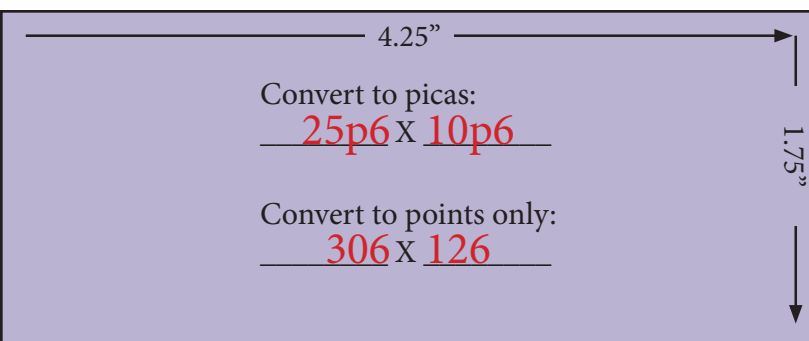

d.

Convert to inches:  
1.62" X 2"

Convert to points only:  
117 X 144

e.

Convert to picas:  
25p6 X 10p6

Convert to points only:  
306 X 126
